FREE UPGRADE!!

10/21/2015

Hello OffenderWatch® NCIC users:

We've added some new functionality to OffenderWatch® that benefits all clients, but particularly agencies sending NCIC data. This last quarter we added over 100 new vehicle "Models" in the "Vehicles" tab.

We were also asked to start requiring "Style" in the "Vehicles" tab, as NCIC requires that this field also be submitted with vehicle data. "Style" will now be required on new entries and has been populated with "None Reported" for prior entries. We hope this change helps users stay on top of adding data needed for NCIC submissions.

Lastly, many of our partnering state agencies using OffenderWatch® to submit NCIC data on sex offenders, conduct NCIC audits on counties within their state. So they needed the "County" search field added to the NCIC Response log in OffenderWatch® to simplify their process. We have added this searchable field. The NCIC Response Log can be found under "Reports" in the top menu.

Thank you!
OffenderWatch® Support Team
