Mobile

The Smart Way to Manage Offenders in the Field

OffenderWatch® Mobile is an easy to use app for accessing and updating offender records from your smart phone or tablet.

Quicker compliance sweeps- Officers can verify offender addresses, take photos of vehicles, add investigative notes, and record the time and location.

Supports criminal investigators- Search and view offender images, name, reg. number, risk level, phones, vehicles, home/work/school/volunteer addresses, and criminal history.

Quick abduction response- A radial search displays all offenders within a given radius of your device location.

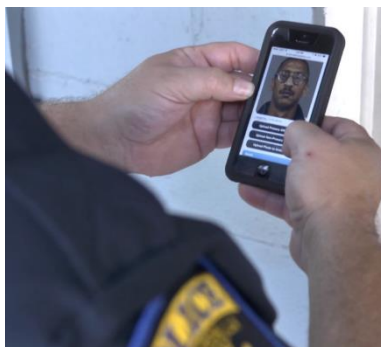

Better use of resources- Assign offenders by zones, which can be placed in "My Queue" for follow-up. "My Queue" can be mapped along with turn by turn directions.

Better evidence of verification- Photos and records are location and time stamped to prove attempts at verifications. Used in obtaining warrants.

Essential for tracking homeless offenders- Update photos and pin the location in non-residential locations like parks, intersections, or wooded areas.

Instant Availability. No app to install, no IT support needed. Works on any web enabled device.

"Before we had OffenderWatch Mobile, it took us two weeks to complete our quarterly address verifications," said Deputy Waldorf of the Butler County Sheriff's Office. "Now that we have the mobile app, it takes just two days."

New in Version 2.0

- Fresh look & feel
- My Queue list for follow-up
- Better search and radial search
- Get driving directions
- Map search results, My Queue, or offenders around my location
- Built-in help
